

DIGISYS OY RESPONSIBILITY, PROCUREMENT AND PURCHASING

Digisys Oy's board and management want to demonstrate responsibility in purchasing and purchasing, the selection of products, services and materials and procurement processes that take environmental, social, and economic impacts into account. The goal of Digisys' sustainable sourcing and purchasing is to reduce the environmental burden, promote ethical practices and support financial sustainability.

Environmentally friendly products and services:

Digisys acquires products and services that are environmentally friendly, such as energy-efficient equipment, recyclable materials or services that produce renewable energy.

Ethical sourcing:

Digisys ensures that the supply chain follows ethical practices, such as respecting human rights and protecting the rights of employees. Digisys requires the submission of ethical guidelines upon request.

Local and small suppliers:

Digisys encourages and supports local businesses and small suppliers, which can boost the local economy and reduce the carbon footprint of transportation.

Considering the life cycle of products:

Digisys assesses the product's entire life cycle, including product manufacturing, transportation, service life and recyclability. Digisys strives to choose products that cause as little environmental impact as possible during their entire life cycle. In its own products and services, Digisys takes into account the consideration and notification of the products' life cycle.

Certificates and marks:

When choosing products, Digisys considers products that have received sustainable development certificates or marks, such as the EU environmental mark or the fair trademark.

Cost effectiveness:

Digisys has noted that sustainable procurement is often cost-effective in the long term, when energy savings, longer service life and lower maintenance costs are taken into account.

Procurement policy:

In procurement, Digisys follows all its guidelines for sustainable development and requires the persons responsible for procurement to comply with it, as well as to commit to the principles of sustainable development.

Raising awareness:

Digisys trains staff and informs stakeholders about sustainable acquisitions and purchases so they can make informed decisions.

Monitoring and reporting:

Digisys evaluates and monitors the sustainability of acquisitions and purchases regularly and reports on the achieved results to stakeholders whenever requested, and annually in the reports.

Digisys sustainable acquisitions and purchasing are an important part of the company's and organizations' responsibility, and they can promote both environmental and financial sustainability. In addition, they can meet the growing demand for sustainable products and services.
